

### Newlec DALI Power Supply Unit NL5712

#### Product description

The Newlec DALI Power Supply Unit is essential to power the Newlec DALI Occupancy Detector (NL5701DALI) and the DALI luminaire ballasts on the network. One power supply unit is required per network or one power supply can be used for a larger network with the DALI Occupancy Detectors dividing the lighting ballasts into groups.

#### Key features

- For use with Newlec DALI Network System
- Powers DALI network of Occupancy Detectors and lighting ballasts
- Thermal and overload protection
- Connected to multi-purpose connection box (NL5713)

#### Technical details

- 18V d.c. 250mA
- Complies with IEC 62386-101,-102,-103
- Power Consumption 0.15W
- Flame Retardant ABS material

#### Date completed by manufacturer
