

Newlec Outdoor Electronic Touch Time Delay Switch (NL5730A)

The Newlec Outdoor Electronic Touch Time Delay Switch (NL5730A) is part of the Newlec family of switches, timers and detectors which save energy and increase convenience in and around your home or business premises.

Product description

Newlec Electronic Time Delay Switch for general purpose time controls including lighting (instant-start or hot re-strike only), heating and ventilation systems. They are particularly popular for use with outdoor patio or Infra-red heaters.

The Time Delay Switch can replace an existing switch with a neutral to provide energy saving functionality by timing power source off to avoid unnecessary power usage. This intelligent unit also provides variable timing selection. Recommended connections are with IP rated cable glands/SWA glands. With SWA cable glands it is advisable to use nylon sealing washers in connections to the box.

Key features

- 16A any load type (requires Newlec capacitor NL5705A for all types of low wattage and in particular LED loads)
