# Fast delivery

Place your order by 2pm and we deliver next day

Speed and accuracy of delivery are important to us, and to you. It is the scale of our UK-wide logistics operation that means you get your order when you need it.

Our delivery costs are calculated by area. Give us 7 days to deliver and we'll reduce any delivery costs by 50%.

That's a promise.

## Energeasy Drive

An exclusive programme to help you grow your sales of electric vehicle charging points

### Become an Energeasy Drive installer

Electric vehicle sales are growing every month and are now in their multi-thousands. New vehicle charging points are needed by:

- Vehicle owners at home
- Company fleet owners
- Local authorities

As a Rexel Energeasy Drive installer you will enjoy a package of benefits to give you the knowledge and tools you need to penetrate this new market.

Our vehicle charging infrastructure is growing.

As a Rexel Energeasy installer you can be part of it.

## What's in store for Energy Storage?

**We explain why battery energy storage is set to revolutionise the UK renewables market.**

**T**he UK's clean energy infrastructure has advanced at a rapid pace, with £37 billion having been invested in renewable technology between 2010 and 2015<sup>1</sup>.

But it's not only the overall investment that's increased. A recent energy efficiency trends<sup>2</sup> report indicated that demand for energy saving products from end-users is strong in the UK market - including a rise in solar activity, despite the changes to the feed-in-tariff at the beginning of the year.

Interestingly, accordingly to the report, offices are leading the way as the commercial property type most likely to benefit from building upgrades, such as renewable technology and other energy performance measures.

All of this marks the growing appetite from business owners to make the most of any investment already made into renewables installations, including solar PV.

Here, battery energy storage is set to revolutionise the way organisations and consumers alike utilise the 'free-energy' generated, with or without subsidy.

Whilst most renewable installations can make the most of battery storage, there is evidence to prove that solar PV in particular offers

the highest potential. In fact, solar PV installed alongside a storage battery could increase a system's self-consumption capabilities to 70 per cent, and reduce the amount of energy sent back to the grid by 50 per cent. The latter of which is a particularly pertinent for end-users, ensuring they are utilising all of the energy generated by their solar installation.

### **£37 billion invested in renewable tech from 2010 to 2015**

Importantly, it's not just existing solar installations that can generate these benefits. The cost for a new solar PV system has decreased by more than 50 per cent in the last three years, making the payback periods even more inviting for building owners that incorporate energy storage as part of the installation.

Battery storage is already well established in some European countries and one observation from the success Germany has had in the residential sector is that Lithium Ion batteries have been used in 90 per cent of battery storage installations, incorporating the already proven technology that's widely used in electronic devices such as laptops

and mobile devices. Lithium Ion battery storage products are much more efficient, with a longer expected life time than lead acid counterparts. They are also better placed to discharge higher levels of stored energy - an important factor for the UK commercial market.

When selecting a battery storage system, its important will look at estimated daily energy consumption (kWh), peak load time for the building, how much solar PV can be or is already installed and the anticipated generation of the system. This means specifiers can then calculate the correct battery capacity and whether a single or 3 phase supply set up is more appropriate. Space and location must also considered as this can impact on the way the battery packs are installed, i.e. is there easy access for both installation and maintenance, and any safety implications.

Another obstacle is that there are currently no regulations for battery storage in the UK. However, the IET (Institution of Engineering & Technology) are in the process of developing Codes of Practice for contractors - a move that we strongly advocate, as it is vital for the industry to quickly establish best practice and a common language for the market as early on as possible. This can help alleviate some of the quality and performance stumbling blocks which faced the solar PV market when it first emerged back in 2005.

While the industry works to establish a standardised framework, we would strongly recommend engineers work closely with responsible

manufacturers and suppliers that have taken the time to understand the market, the technology and the safety implications behind the products. For example, at Rexel we are working on the creation of a specification tool that to assist selection and correct sizing of an energy battery storage system, ensuring the correct load demand and consumption has been taken into account.

There is no doubt, battery energy storage is set to revolutionise the renewables sector. But during the implementation phase, it is vital for building engineers to collaborate with both manufacturers and suppliers that have taken the time to develop technical understanding, their in-house capabilities and training programmes. This partnership will result in is well-specified battery storage systems that enable users to truly take control of their energy generation, and achieve the greater cost savings.

# Solar Modules

The most important part of the PV system is the module and we supply a variety of leading brand, high quality mono and polycrystalline units.

All modules held in stock and ordered by 2pm are despatched on the day of order. Plan ahead to reduce your costs with our 7 day delivery.

## Winaico

### Excellent weak light performance

Winaico are positioned amongst the top brand manufacturers with a high-quality product from an automated production line.

Series WST is the ideal module for commercial and large-scale projects.

- Features silver 35mm single-walled frame
- Incorporates only top quality branded components
- 99% relative efficiency at weak light
- Tested 3 times above IEC standards
- Increased efficiency from PERC models boosts performance at high temperatures and low light conditions

Product code	Description	Part number
2500798748	260W Poly Silver Frame	WST-260P6
2500872173	275W PERC Poly Black Frame	WST-275P6
2500885477	295W PERC Mono Black Frame	WSP-295M6FB
2500885478	310W PERC Mono Black Frame	WSP-2310M6

## Trina Solar

### High efficiency Honey

Developed with advances in multicrystalline cell technology, Trina Solar's Honey cells deliver higher efficiencies and world-record-setting power output.

Meeting all of your PV needs, they come with Trina Solar's standard warranties.

- 60 cell construction
- MC4 connectivity
- Highly reliable due to stringent quality control
- Poly or monocrystalline options available
- Silver anodized aluminium alloy frame

Product code	Description	Part number
2500866351	265W Poly Silver Frame	TSM-265-PD05A

## Trina Solar Trinasmart

### Smarter power

Trinasmart modules incorporate innovative power electronics from Tigo Energy to give module level power optimisation, monitoring & diagnostics and increased safety.

- Increased output per module
- 30% longer strings
- See page 41 for more details of this and the Tigo energy management unit.

Product code	Description	Part number
2500674350	270W Mono Black Frame	TSM-270-DC05A.082

## Did you know?

The atmosphere receives over 150 petawatts of power from the sun, of which some is reflected back and the rest absorbed by the sea and earth. One petawatt is equal to one billion million watts.

LG

### High output with excellent craftsmanship

Our BiFacial module from LG has been designed using LG's CELLO technology. The cell efficiency on the rear side is only slightly lower (20%) than on the front side (21%).

Light hitting both front and rear of the cell is especially significant during the morning and afternoon hours when light has a lower angle of incidence.

Across the LG range, excellent craftsmanship and good cost/performance ratio come as standard.

Product code	Description	Part number
2500838903	MonoX - 285W Black Frame	LG285S1C-L4
2500796997	NeON 2 - 300W Black Frame	LG300N1K-G4
2500922646	NeON 2 - 300W Bi-Facial Black Frame	LG300N1T-G4
2500922645	NeON 2 - 320W Black Frame	LG320N1C-G4

SunSolar

Made in UK

SunSolar are the UK's only UK manufacturer of Solar Photovoltaic panels and their quality control is among the most stringent.

The latest Triple A+ rated flash testing equipment tests all panels against IEC 60904.9 standards.

- New 255W module now available
- All panels use high quality glass, cells and frames.
- 10 year 90% power output warranty
- 25 year 80% power output warranty

Product code	Description	Part number
2500934543	255W Mono Black Frame	SS 255W

SolarWorld

### Consistency guaranteed

SolarWorld guarantees less than 2% power tolerance between modules, or -0 to +5wp. This means module-to-module consistency is assured.

- Tested by standards organisation TUV Rheinland in Germany
- Maximum output degredation of 0.7% p.a.
- Choose from black or silver framed

Product code	Description	Part number
2500704793	260W Poly Silver Frame	SW260
2500820079	270W Mono Silver Frame	SW270
2500703442	285W Mono Black Frame	SW285

## Property value boost adds to solar success

Research reveals that solar panels can increase a property's value by almost a fifth, making the financial case for solar still strong, despite today's lower tariffs.

According to the study<sup>1</sup>, installing solar panels can increase the value of a home by an average of 17 per cent, while helping it to sell 20 per cent faster. In addition, falling costs means that solar still delivers a healthy return on investment and can help to reduce your electricity bill by around 50%.

In this way, a solar PV installation can add huge additional value to a property while also ensuring a wider appeal for those looking to sell. After all, with energy bills presenting one of the biggest financial concerns for UK consumers, the draw of a 50% reduction is only going to become more and more attractive.

Added to this we have developments in solar energy storage. There are many companies with products in the marketplace that can store energy for later use, reducing even further users' reliance on the grid. Looking ahead as more storage products become available and prices come down, storage will become

mainstream in the domestic environment. Even now, however, storage can be retro-fitted, in many cases, to existing solar installations.

### Store energy for later use

As a business committed to driving solar adoption forward, our innovative Energeasy Solar online platform has been designed to reaffirm consumer confidence in solar. The service is designed to support the time-stretched installer, who can use the dedicated portal to manage existing and prospective clients, as well as the installation process from beginning to end - all within a personalised, password protected space.

The reality is that solar is integral to achieving our carbon reduction targets and realising a low carbon future. While today's lower FiT may pose a momentary stumbling block, there is no doubt that solar adoption will continue to grow year on year.

# THE NEW SUNNY BOY STORAGE 2.5

COST EFFECTIVE, FLEXIBLE, SIMPLE

The Sunny Boy Storage is the ideal battery inverter for high-voltage batteries like the Tesla Powerwall. The Sunny Boy Storage has a charge and discharge power of 2.5 kW, it is ideally suited to coping with the electricity demand of a private household.

The device enables a significant reduction in system and installation costs by combining the flexibility of AC coupling with the advantages of high-voltage technology. Commissioning is simple and the energy flows in the household are completely clear thanks to the integrated web server and direct access to Sunny Portal.

However electric current is produced and consumed, the Sunny Boy Storage does it all and with maximum flexibility both now and in the future.

See page 28 for more information

ENERGY  
THAT  
CHANGES

# Inverters

Considered to be the brains of a solar installation, solar inverters play a critical role and today do more than convert generated power to usable AC.

Communications, data sharing, online monitoring, management and control is carried out via wireless or ethernet connection, available on many or all inverters today.

# Introducing SolaX

SOLAX  
POWER

## NEW X-Hybrid inverters with battery storage

- ✓ Very high efficiency
- ✓ 2.4 or 6.4kWh battery depending on needs
- ✓ Use up to 85% of generated solar energy
- ✓ Integrated WiFi monitoring
- ✓ Emergency power supply facility (EPS)
- ✓ Low noise
- ✓ Wide voltage range

## SolaX energy storage system for your customers

SolaX hybrid inverters are designed to store surplus energy in batteries for later use. When user demand is greatest during the evening, batteries supply some or all power to lights and appliances. Household load will determine which of our batteries you install.

of their generated energy as possible. Offer them a SolaX energy storage system and you'll install a cutting edge hybrid system giving peace of mind. Real-time system monitoring is made easy via smartphone app or the SolaX web portal.

It's an intelligent, integrated storage system.

Your customers need to know they are using as much

## SUN2000 33kW 3-phase Solar Inverter

**For large-scale  
commercial rooftop and  
ground-level plants**

Enjoy a maximum efficiency of 98.8 percent and up to three Maximum Power Point Tracking (MPPT) routes for complete all-round versatility.

**More information on page 32**

SUN2000-33KTL

# Micro-Inverters

Micro-inverters simplify solar array design and installation since a single micro-inverter is used for each module, typically mounted with or alongside the module.

The outputs of all micro inverters are connected in parallel and no string inverter is needed. Output is optimised on a per panel basis and overall losses due to shade minimised.

## How they work

### Enphase® Microinverter

Installed beneath each solar panel, Enphase Microinverters maximise energy production and convert DC power into low-voltage AC electricity. They offer greater design flexibility to fit on different roof planes and multiple buildings.

### Envoy® Communications Gateway

The Envoy acts as a messenger between your microinverters and Enlighten software, collecting energy production data over your home's electrical wiring and sending the data through your Internet router to Enphase's data centres.

### Enlighten®

Solar professionals use Enlighten Software to remotely monitor, manage, and troubleshoot your system 24 hours a day from any PC, tablet, or smartphone. You can use MyEnlighten, a user-friendly version of the software, to keep track of energy production.

## Enphase Micro-Inverter

### Get maximum array output

More resilient to dust, debris, and module shading, micro-inverters extract more power from a given array.

Based on Enphase's 4th generation technology these new models incorporate the latest innovations in power electronics and custom microchips to deliver 96% CEC efficiency and a range of performance features.

- Plug and play installation
- M250 is optimised for higher powered modules to 300W

## Wiring it up!

Go to our website and you'll find a range of trunk cables, terminators, couplers and other accessories for installing Enphase micro-inverters.

[www.RexelEnergySolutions.co.uk](http://www.RexelEnergySolutions.co.uk)

### Enphase Envoy

Envoy is the networking hub connecting every module and Enphase micro-inverter to the Internet. System performance is monitored via Enlighten web based software.

# Power Optimisers

When fluctuating levels of shade or differences in panel direction reduce the output of a PV installation, power optimisation technology can help.

Our power optimisers can increase energy output per module by using maximum power point tracking (MPPT), which is especially effective in low light conditions.

## How they work

### System Architecture

Trinasolar system components work together with any inverter to maximize energy harvest. Trinasolar modules communicate wirelessly through the gateway, allowing users to monitor system performance in real time.

### Trinasolar Optimised Solar Module

#### Smart electronics, increased output

Trina's new Trinasolar modules benefit from in-built power optimisation to give industry leading advances in performance. More energy output, module-level monitoring and diagnostics and additional safety are the result. The ability to install longer strings enables cost savings at the inverter.

#### Up to 20% more output

Packaged into the rear junction box is a sophisticated energy maximiser from Tigo Energy, an innovative combination of hardware and software that increases the output of solar arrays by up to 20 percent.

The maximiser improves safety by allowing module-level deactivation.

Product code	Description	Part number
2500674350	Trinasolar 270W Trinasolar Mono Module	TSM-270-DC05A.082

2500791649	TIGO Extra Communication Gateway	150-00000-50

### SolarEdge P-series Module Optimisers

#### Peak performance

Achieve up to 25% increase in power output and a superior efficiency of 99.5%. These optimisers offer peak performance in both mismatched and unshaded conditions.

Plug an optimiser to each module and you'll enjoy maximum power point tracking for each module.

Product code	Output Power (W)	Part number

## Solar Optimisation

Solar optimisation units give you the best of both worlds. When daytime power requirement is low, excess power generated can be used to heat water.

Making use of the power while it is available is an excellent way to get the most from an installation and keep energy bills low.

### Powerdiverter

#### Easy to install

Powerdiverter is designed to divert excess power from a solar PV installation to the immersion heater to provide free hot water.

Its custom made wireless technology makes it easy to install in around 20 minutes. It does not affect feed-in tariff rates or payments and no plumbing is required.

- One button control
- No additional wiring needed
- No plumbing required
- Wireless as standard
- Boost button gives hot water on demand

Product code	Description	Part number
2500866352	Powerdiverter	PD1C

# Safety Equipment

Safe working at height demands that employers, installers and owners of premises where work is to be carried out employ proper and serviceable Personal Protective Equipment (PPE) and other safety equipment.

Our range of certified safety harnesses and accessories will provide the level of safety and protection you need.

## JSP Roofer and Fall Arrest Kits

Wearing the correct harness ensures your safety at all times. These two kits provide you with all the security and protection you need and come in a handy rucksack.

### Pioneer Roofers Kit

- 2-point harness, conforms to EN361:2002
- 10m adjustable restraint lanyard
- Retractable fall limiter conforms to EN358:1999 and EN353-2:2002

### Pioneer Fall Arrest Kit

- 2-point harness, conforms to EN361:2002
- Fall limiter conforms to EN355:2002
- 2m fall arrest lanyard

2500698628	Pioneer Roofers Kit	FAR1105
2500698627	Pioneer Fall Arrest Kit	FAR1104

## Accessories

### Pioneer 2-point Harness

A harness with fully adjustable chest, shoulder and leg straps. Colour-coded shoulder and leg straps for ease of identification.

- Up to 136kg weight accommodated
- Conforms to EN361:2002

### Restraint Lanyards

For use when constantly changing working position. Conforms to EN353-2:2002 and EN358:1999

- Adjustable rope grab
- 12mm Kernmantle professional rope

Product code	Description	Part number
2500698661	5m Lanyard	FAR0801
2500698650	10m Lanyard	FAR0802

### Horizontal Life Line

Used with adjustable restraint lanyards and is extendable to 20m between two points of anchorage.

- Tested for up to 2 persons
- Ratchet tensioning system
- Conforms to EN795:2012 Class B

Product code	Description	Part number
2500698653	Horizontal Life-Line	FAR0804

### Harness Attachment Lanyard

Attaches the rope grab to harness.

- Length 30cm
- Conforms to EN353-2:2002 and EN358:1999

Product code	Description	Part number
2500698652	30cm Lanyard	FAR0805

### Tool Lanyard

High-visibility 16mm elasticated tubular webbing lanyards for securing tools at height.

- Secures up to 7kg of tools

Product code	Description	Part number
1030083046	Single Lanyard	FAR0502
1030083047	Twin Lanyard	FAR0503

## Did you know?

It is important to carry out the correct measure of risk assessment prior to work and comply with necessary regulations.

See Work at Height Regulations 2005 for guidance on what is applicable.

# Mounting Systems

The mechanical safety of a solar installation lies in the quality of mounting used to secure the modules in place.

Our range of module mounting equipment includes mounting rails, mounting kits and mounting components from Schletter, Redtip, Van der Valk and Solarworld. Each is designed to make your installation hold firm in the harshest of weather.

## Redtip Mounting System

### For tiled or sheet roof

Simple to install REDtip mounting systems give an elegant finish to any PV array. Choose ExpressRail for tiled roofs or SwiftRail for profiled sheet roofs. Both systems benefit from tough universal, wrap around jointing plates and easy assembly clamps.

Product code	Description	Part number
2500629256	1KW Kit in a box Silver	1KW-SLV
2500629257	1KW Kit in a box Black	1KW-BLK
2500629258	Joining Kit for joining 2 x Silver	JOIN1KW-SLV
2500629259	Joining Kit for joining 2 x Black	JOIN1KW-BLK
2500629250	REDTIP ExpressRail 2400mm	ERAIL2400
2500578438	REDTIP ExpressRail 3200mm	ERAIL3200
2500578440	REDTIP ExpressRail Connector	ERAIL-C
2500595895	REDTIP SwiftRail 3200mm	SRAIL3200

## Schletter Mounting System

### Wide range of components

Schletter's most popular fixings and fastenings for corrugated or pitched roof systems.

Product code	Description	Part number
2500669752	Singlefix-V Solo Mounting Kit	113009-200
2500669767	Roof Hook Plain Tile	103001-001
2500669757	Roof Hook Rapid 2+ Universal	101004-000
2500669708	Roof Hook Universal Klicktop	100001-001
2500669762	Kit for corrugated roofs	111110-200
2500669761	Attachment for roof hooks	109008-000
2500669740	Module Bearing Rail 3.1M	120002-310
2500669741	Module Bearing Rail 4.2M	120002-400

## Van der Valk Mounting Kits

### Modular systems for all roof types

Dutch company Van der Valk Solar is a specialised enterprise that is fully focused on developing and producing solar mounting products. All systems are produced in compliance with worldwide standards and are designed to be highly modular and easy to assemble, with solutions for all common roofing types.

### ValkPro+

The latest system from Van der Valk is already enthusiastically received by wholesalers and installers for its advantages.

- Faster than ever mounting
- Metal connectors for strength
- Suitable for high domestic and commercial roofs

### ValkPitched - Trapezoidal

Perfect for steel roofs.

- Clamp system with universal mid- and end-panel clamps
- Watertight fixing with special thin sheet screws or rivets
- Pre-punched holes in profiles for quick and easy assembly

And there's more....

See the complete range of Van der Valk products below and over the page.

## Van der Valk Mounting Kits

### All-in-one kits for flat roofs

We offer a range of kits for mounting solar panels safely and securely.

Kits contain all the components you need for mounting up to four panels.

- Kits for 1, 2, 3 or 4 panels available

Product code	Description	Part number
2500818740	ValkBox suitable for 1 Panel	759003G
2500818735	ValkDouble suitable for 2 Panels	757008G
2500818736	ValkTriple suitable for 3 Panels	757010G
2500818737	ValkQuatro suitable for 4 Panels	757012G

## Van der Valk Mounting Systems

## Flat roof systems

Developed with a focus on wind loads, our three flat roof systems comply with the most stringent safety requirements. Various foundations are used including rubber tile carriers, mass blocks and consoles.

**Full Ballast calculations and blocks suitable for each project are available on request**

## ValkFlat - Portrait

Pre-mounted A-frames make the ValkFlat Portrait for flat roofs even quicker to assemble.

- Clamp system designed for portrait configuration
- Any tilt angle possible
- Low ballast due to coupled design

## ValkFlat - Landscape

Using an insert fixation method, the landscape oriented system for flat roofs uses pre-mounted A-frames for quick to assembly.

- Self aligning panels
- Panels supported on the long sides
- Any tilt angle possible

## ValkPro+

The latest system from Van der Valk is already enthusiastically received by wholesalers and installers for its advantages.

- Faster than ever mounting
- Metal connectors for strength
- Suitable for high domestic and commercial roofs

## Pitched roof systems

Our three pitched roof systems each use a different panel fixation method. This ensures a rapid and reliable mounting on tiled, steel, corrugated or standing seam roofs.

## ValkPitched - Clamp

A unique clamping system, ideal for all pitched roof types.

- Reduced roof fixing due to strong profile design
- Practical and safe side-mounting
- Strong, all-weather design

## ValkPitched - Insert

An extremely fast-to-install panel mounting system.

- Self aligning panels make installation easy
- Sleek appearance
- Minimum number of profiles required

## ValkPitched - Trapezoidal

Perfect for steel roofs.

- Clamp system with universal mid- and end-panel clamps
- Watertight fixing with special thin sheet screws or rivets

Pre-punched holes in profiles for quick and easy assembly

## Easy Roof Mounting System

### Easy Roof Evolution - In-roof mounting system for PV modules

Now available from Rexel comes Easy Roof – a revolutionary in-roof mounting system for PV modules.

Easy Roof fits to the roof just like tiles and can be used to install portrait or landscape orientation panels. It is also comparably quick to use. A 3kW system, for instance, can be installed using Easy Roof in 6 hours by 2 fitters.

Thanks to an overlapping mounting system, Easy Roof is ideal for use with all kinds of roofs and tiles and many types of building:

- Residential
- Commercial
- Public buildings
- Agricultural
- Industrial

2500799478	Easyroof Mounting Tool	OUT002V01
2500872214	Easyroof Mounting Tool	OUT003V01

#### Why use Easy Roof?

- ✓ Easy to handle and transport due to its low weight
- ✓ Many parts common to portrait and landscape layout (except frame)
- ✓ Fits all roofs, even distorted, with slopes from 10° to 50°
- ✓ Integrated top flashing
- ✓ Modules can be replaced or removed individually
- ✓ Single screw fixing clamps
- ✓ Fits most of PV modules currently available on the market

# Cables & Connectors

Connecting a solar PV system to the grid and to a premises electrical supply can be completed easily with high quality accessories and equipment.

Our range of cables, connectors, AC/DC switchgears and tools enables you to do this safely, ensuring that the system installed is practical and easy to use for your customers.

## Solar Cables

### Tough extension cable

High resistance to abrasion is a key feature of the insulation on these 4 and 6mm diameter cables, coupled with the ability to withstand high temperatures. For ease of termination the external sheath can be removed from the inner layer of extruded insulation.

- TV 2 Pfg 1169/08.2007
- EN 60216-1-2
- EN 50267-2-1

Product code	Description	Part number
2500706954	4mm x 50m Solar Cable	SOLBLK-4-50
2500706955	4mm x 100m Solar Cable	SOLBLK-4-100
2500706956	4mm x 250m Solar Cable	SOLBLK-4-250

2500706960	6mm x 500m Solar Cable	SOLBLK-6-500

## H4 Connectors & Tools

### Assembly made easy

Quality solar connectors and tooling, including a crimping tool with built-in positioner and crimping insert.

Product code	Description	Part number
2500707687	H4 Male plug S&F 4-6mm	H4M
2500707688	H4 Female socket S&F 4-6mm	H4F
2500707689	H4 Crimping Pliers S&F	H4TC0002
2500707690	Installation Wrench for H4	PV-670803

## DC Switch Disconnectors

### Get safe string isolation

Switch disconnector from C&D designed to isolate Photovoltaic arrays from the associated inverter. Complies with the isolation requirements of BS EN 60364-7-712.

- Environment protection to IP66

Product code	Description	Part number
2500629433	16A 2P IP66 1,000V DC Isolator	PVP162

## MC4 Connectors

### The reliable MC4s

Long term stability and guaranteed reliability from the creator of MC4.

Product code	Description	Part number
2500442612	MC4 +ve Female Socket 4-6mm	32.0016
2500442614	MC4 +ve Female-Male/Male Branch	32.0018
2500442611	MC4 -ve Male Plug 4-6mm	32.0017
2500442613	MC4 +ve Male-Female/Female Branch	32.0019

## DC Switch Disconnectors

### PV isolation from ABB

Enclosed OTDC switches in 16A to meet the demanding requirements of photovoltaic applications.

- For safe, reliable string isolation
- 2 or 3 pole options
- M20 threaded knock-outs

Product code	Description	Part number
2500513812	16A 3P IP65 1,000V DC Isolator	OTDCP16S12M
2500513811	16A 2P IP65 660V DC Isolator	OTDCP16S11M

## Did you know?

Multi-Contact created the original MC4 connector, the successor to MC3.

Positive locking for safety, they enable high voltage connections to be made without the need for specialist electrical training.

## Goodbye, range anxiety. Hello, new opportunity?

Why this is the year for drivers to get 'range confident' and how installers can help to dispel the 'range anxiety' myth.

**E**lectric vehicles have come a long way in the last decade. They're more reliable, powerful, and stylish, and cost of ownership is coming down all the time.

No surprise then that Go Ultra Low, the joint Government and car industry campaign to get drivers to switch to electric vehicles, said year-on-year sales were up 23%, with more than 115 electric cars registered every day in the first quarter of 2016, equivalent to one every 13 minutes.<sup>1</sup> However, there are still barriers to overcome.

### A range of reasons to say goodbye to 'range anxiety'

Top of the list is 'range anxiety'. This is where consumers are worried about running out of battery power before reaching their destination or a suitable charging point. It is a fear that stems way back to the beginnings of the EV industry.

Fast forward to today, however, and the EV industry has really come into its own. We already have more than 10,000 publicly-accessible charge points located across the UK and many more new units are being installed in urban and rural areas.

Also, the Government recently announced the regional winners

of its Go Ultra Low City Scheme who will share a pot of £40m to invest in the technology and initiatives needed to drive demand for low emission vehicles. These include London, Nottingham, Bristol, Milton Keynes and four other towns.

In addition, the Government announced a long-term extension to the plug-in car grant, backed by a £400 million package to treble the number of ultra-low emission vehicles on Britain's roads.

Another factor is the continual advancement in charging technology, with charging times coming down from several hours to 20 minutes - and improvements in vehicle range.

### Helping to dispel the myth

How then, can installers play a role in communicating the benefits of EVs to consumers more effectively? Setting out the facts about what EVs do and don't offer - and challenging the common 'range anxiety' assumption - is an important step in making the sales message more effective.

We must remember that the average car journey in the UK is just 7.1 miles - perfect for EV driving. Given that the typical consumer would think little of

driving to work or doing the school run on a low tank of petrol, challenging drivers' mindset is key to beating anxiety about range.

### Getting up to speed with the EV opportunity

There is, of course, a growing new business opportunity for the traditional electrical contractor to diversify into and, in turn, reap the financial rewards.

To begin with, training is king and the good news is that there are plenty of courses specifically aimed at those contractors looking to diversifying into the EV sector.

In addition, it is also important to work with a reputable supplier with a genuine expertise in the EV charging arena to ensure the utmost in product quality, reliability and, ultimately, a best practice installation.

At Rexel we recently launched a brand new online platform, designed to help installers get on board with the electric vehicle (EV) market and make the most

of the growing opportunity: Energeasy Drive.

This new service is designed to empower installers with the knowledge, training and marketing support they need to enter and succeed in UK's growing EV sector. On the platform, they'll be regularly updated with information and news on developments in electric vehicles and innovations in charging technology. And, for those wanting to find out how others have flourished in the market, success stories are available.

It is an incredibly exciting time for EV. Already last year saw the market hit record sales, a figure which is to be superseded this year as more businesses and consumers seek to embrace the financial benefits of making the switch. However, on a wider level there is still work to be done. As an industry we can look to dispel the 'range anxiety' stigma once and for all and introduce 'range confidence'.

For more information about EnergeasyDrive, go to:

## Charging Infrastructure

The wide scope of access options and network schemes available for electric vehicle charge points allows site owners to choose a system best suited to their customers' needs.

These range from free-access charge points to those with one of a number of types of access control methods.

### Free to use

Any person with a compatible charging lead can simply plug in and go – no payment is required. Ideal for workplace staff car parks where access is already controlled.

### Keyswitch

Provides an element of control as users will need a key to start the charge process. Authorised users only will have access, whether staff members, other nominated personnel or selected customers.

### Token or coin

This is the pre-payment method – tokens may be pre-issued to nominated personnel or obtained on demand. Businesses, hotels etc may wish to offer free tokens to guests or customers.

Alternatively, the use of a coin could provide a set charging period.

### RFID / Smart Phone App

**Internal network** - Charging sessions are initiated by either an RFID card or Smartphone app and where businesses or concerns have an internal network control and monitoring system in place.

**External network** - Users have a pre-paid network card issued by bodies such as BMWi ChargeNow, Chargemaster Polar Network, CYC Charge-Your-Car, Source London etc. Users belong to one or more networks and are charged by them accordingly.

### Bank Card Access / PAYG

Charging sessions are initiated by a credit or debit card at the charging point. Access and use is cost controlled and similar in operation to vending machines, car parking ticket machines, toll booths etc. This relatively new payment method is open to all, with no internal or third party controlling network involved.

# Domestic Chargers

Dedicated charge points for home use allow for the installation of Mode 3 or Mode 2 charging at any convenient outdoor location.

Our chargers are attractively styled to look good in any domestic environment. They are IP rated to withstand harsh weather.

## WallPod HomeCharge

WALL MOUNT

MODE 3

SINGLE OUTLET

A simple mode 3 unit compatible with all electric vehicles.

- Protective RCBO behind IP65 access window

Product code	Description	Part number
2500511332	HomeCharge 16A 1Ph - Type 1 (J1772) Tethered lead	EVWP1080
2500511338	HomeCharge 32A 1Ph - Type 1 (J1772) Tethered lead	EVWP1140
2500511347	HomeCharge 16A 1Ph - Type 2 (IEC62196) Tethered lead	EVWP2080
2500511353	HomeCharge 32A 1Ph - Type 2 (IEC62196) Tethered lead	EVWP2140
2500511341	HomeCharge 16A 1Ph - Type 2 (IEC62196) Socket without Hatchlock	EVWP2010
2500511342	HomeCharge 32A 1Ph - Type 2 (IEC62196) Socket without Hatchlock	EVWP2020

## WallPod EV Ready & BikeCharge

WALL MOUNT

MODE 2

SINGLE OUTLET

Charges all current electric vehicles at mode 2. Easily and cost-effectively upgrades to full mode 3 EV charging.

- 13A IP65 socket with 10A 30mA RCBO
- Doubles as a standard outdoor IP65 rated 13A maintenance socket

Product code	Description	Part number
2500511305	EV Ready deep base 13A 1Ph	EVWP0020
2500627005	BikeCharge shallow base 13A 1Ph	EVWP0010

## HomeLine

GROUND MOUNT

WALL MOUNT

MODE 3

SINGLE OUTLET

### New HomeLine offers an attractive option

The ideal charger for private driveways or garages, HomeLine is supplied with either a single socket outlet or 6 or 8 metre Type 1 J1772 tethered lead.

The charger can be wall or pole mounted (See Accessories, page 70).

Charging up to 8 times faster than a standard socket outlet, we supply HomeLine in 2 formats – Autostart or Hub – as detailed below.

- Mode 3 protocol
- Charge activation by charge card or key fob
- Covers – separately available - can be supplied in several colours

### HomeLine Autostart

The standalone charger which is ideal for many home installations. This is the easy plug-and-play solution for quick access to charge. No online management or visibility of charge costs.

### HomeLine Hub

Supplied with kWh meter, RIFD reader, GPS/GSM controller and SIM card.

Hub chargers operate online, connect to the EV-Box BackOffice online management system (for more see BusinessLine on page 63) and firmware can be upgraded remotely.

Can be wall or pole mounted

Product code	Description	Part number	Rating	Outlets	Phase	Type	Connection
2500837496	HomeLine Autostart	H1160-00281	16A	1	Single	1 (J1772)	Tethered lead

# Commercial Chargers

Business owners who are considering the installation of EV charge points at their premises need to think carefully about their intended usage.

Questions such as whether they will be used only by staff, staff and visitors or the general public will influence the choice of charger you install.

## WallPod CommercialCharge

WALL MOUNT

MODE 3

SINGLE OUTLET

### Low cost for the workplace

A low cost, full Mode 3 charger ideal for the workplace or other commercial locations.

- Keyswitch can be added as an optional extra or built on order
- RCBO accessible via IP65 rated access door

## BusinessLine

GROUND MOUNT

WALL MOUNT

MODE 3

SINGLE OUTLET

DUAL OUTLET

## Multiple options make the Ideal business choice

Fit BusinessLine charge points to your customers' premises and give them a highly versatile charging set up modelled to fit their needs.

Choose the appropriate solution depending on the communication, power rating and number of outlets they need. All EV-Box BusinessLine chargers can be wall or pole mounted and finished to suit your customer requirements with a coloured cover.

(See Accessories, page 70).

## BusinessLine Autostart

The standalone charger, ideal for businesses demanding low installation costs – a single power cable is needed - and no online management or visibility of charge costs. Plug-and-play solution for easy, fast access to charge.

## BusinessLine Hub

Supplied with kWh meter, RFID reader, GPS/GSM controller and SIM card. Hub chargers operate online, connects to the EV-Box BackOffice online management system and firmware can be upgraded remotely.

## BusinessLine Satellite

Satellite charging stations communicate via the modem of the Hub charging station and are equipped with a kWh meter and RFID reader. A Satellite charging station always needs a Hub charging station to be connected with.

## For indoor or outdoor use

These Mode 3 chargers are specifically designed for indoor and outdoor public car parks, but are well suited to both busy public areas and private domestic environments.

- 16 or 32A, single or 3-phase versions available
- Simple 4 point wall fixing
- IP54 rated housing
- 5 metre tethered lead (EV-WBC models only)
- Communicating models have a digital display, RFID card reader, and 'smart' metering
- Data costs apply for transmission of usage data back to either an internal or 3rd party back office system, such as CYC or CPS utilising OCPP protocol

# Rapid Chargers

The growing EV industry has resulted in an increased need for commercial charging stations, with DC rapid chargers providing the fastest charge available.

Rapid chargers charge a vehicle in minutes rather than hours and are typically installed in areas where drivers can stop off for a break in a journey, such as a motorway service station.

## How they work

### Mode 4

Rapid charging stations employ Mode 4 charging using a dedicated DC supply.

Mode 4 provides for full control and protection, with the charging cable permanently affixed to the charger. It will only accept connection to a Mode 4 compatible vehicle.

### CHAdemo

CHAdemo is the quick charging method delivering up to 62.5kW DC via a special electrical connector. CHAdemo was the first DC Rapid Charging connector and are generally used by vehicle manufacturers from Asia.

### CCS Combo

CCS Combo is more compact and less mechanically complicated than CHAdemo. It adds two high-powered DC connectors underneath the standard J1772 (U.S.) and Type 2 (European) AC charge connectors.

## Evolt Advanced Rapid

GROUND MOUNT

MODE 4

SINGLE OUTLET

DUAL OUTLET

### Evolt's fastest charger

APT's Advanced Rapid range of DC chargers is the fastest charging solution in the Evolt range.

Easy to operate and fully compliant with CHAdemo and CCS Combo protocols.

- Single and dual charger versions are available with IP54K rated stainless steel enclosures
- Communication to back office system – enabling historical charging history – by 3G modem or Ethernet cable
- Dimensions 940 x 450 x 195mm

Product code	Description	Part number
2500802817	Single DC - 50kW CCS Combo	EV-QP1 CCS
2500802818	Single DC - 50kW CHAdemo	EV-QP1 CHADEMO
2500802819	Single DC & AC - 50kW CCS Combo & 43kW Type 2 AC	EV-QP-MIX-63 CCS
2500802820	Single DC & AC - 50kW CHAdemo & 43kW Type 2 AC	EV-QP-MIX-63 CHADEMO

### EV Connector Leads

#### Enjoy safe, efficient charging

The proven and safe solution for portable EV charging. Our Mode 2 and Mode 3 charging leads enable safe and confident charging for all electric vehicle owners.

**Mode 2** leads comprise J1772 Type 1 and IEC62196 Type 2 versions and have a full range of safety features including RCD, power failure and thermal monitoring and easy to operate graphic touch panel. Both leads supplied with carry case.

**Mode 3** leads are top quality charging leads which enable safe, secure, and durable connectivity between charging units and vehicles.

Both leads are impact and 'run-over' proof.

## EV-Box Accessories

## Essential extras

Charging station accessories for the EV-Box HomeLine and BusinessLine range.

Product code	Description	Part number
2500837516	External modem box	470050
2500837535	RFID charging card	999670
2500837536	RFID key fob	999675

## Did you know?

Early electric cars include one bought by Queen Alexandra, wife of King Edward VII.

It was the first practical electric road carriage and from full charge it could manage 40 miles!

## EV ChargeCheck Portable Tester

# Will it work?

## Peace of mind guaranteed with EV ChargeCheck

Quickly and simply carry out the full range of tests you need.

When your reputation rests on the safety of your work, it pays to have the right tool for the job.

✓ Simulates an electric vehicle

✓ Comprehensive and accurate tester

✓ Protective carry bag included

SPECIAL OFFER PRICE

# £350

## Fully test your installations

Ensures a professional, comprehensive and efficient test of charger performance and safety parameters.

- Tests Types 1 and 2 tethered leads, and Type 2 sockets
- Tests IEC61851-1 Mode 3 compliance
- Enables RCD/RCBO and earth loop testing
- Supplied with 1m Type 1 to Type 2 adaptor lead + carry bag
- Weighs only 2.5kg

# Demand for electric vehicle charge points is growing fast

So is the demand for electricians to install them

Register **today**

## Become an Energeasy Drive installer

Electric vehicle sales are growing every month and are now in their multi-thousands. New vehicle charging points are needed by:

- Vehicle owners at home
- Company fleet owners
- Local authorities

As a Rexel Energeasy Drive installer you will enjoy a package of benefits to give you the knowledge and tools you need to penetrate this new market.

Our vehicle charging infrastructure is growing.

As a Rexel Energeasy installer you can be part of it.

**Register today** as an Energeasy Drive installer and you will gain the knowledge, training and marketing support you need to make the most of this growing opportunity

**ALL FOR FREE**

## Infrared Heating

Far Infrared Heaters make efficient use of an ages old discovery, when William Herschel discovered Far Infrared 200 years ago.

Our Infrared panel and space heaters are the sleek, silent, safe way to heat a building or space using radiant heat.

### How they work

#### Heat transfer through radiation

Far infrared heaters operate in wavelengths which particularly benefit humans, animals and objects. Human and animal skin absorb Far infrared specifically well, because of its 80% water composition. Objects are heated effectively as are the walls and building structure or 'thermal mass'.

#### 1kW Herschel Far Infrared panel

You will feel the heat directly on your skin in the red zone in front of the heater as shown in the diagram. The infrared will travel through the air and heat the thermal mass of the building.

Heat transfer occurs when the emitted radiant energy meets a target object and the energy is absorbed. This is a more efficient form of heat transfer than convection.

## Herschel Far Infrared Heaters

Stylish, efficient and sustainable electric heating

- ✓ Easy to install
- ✓ Attractive
- ✓ Efficient
- ✓ Low running cost
- ✓ No maintenance

And there's more....

See the complete range of Herschel Far Infrared Heaters over the page.

turn the page →

### Why use Far Infrared?

Our Far Infrared electric panel heaters take the form of a discreet white, picture, mirror or glass finish and are mounted on the wall or ceiling. Heaters are ideal for all domestic and many commercial heating environments. They are attractive to look at and blend into the room design seamlessly.

We supply heaters in various sizes and power ratings, dependent on your customer's room size.

The picture panel can be ordered with a standard or bespoke picture of your choice. Mirrors can be placed in humid areas without any condensation forming on the mirror glass.

Herschel's space heating range uses ceramic far infrared emitters to heat large spaces such as warehouses, retail areas and public halls, and can create zone heating if required.

# Air Source Heat Pumps

Air source heat pumps offer a renewable heat and hot water source to new and existing commercial and domestic environments.

We supply a range of units from some of the market leaders in this field. Single and three phase units are available, plus pre-packaged heat pump kits to make installation easier.

## How they work

- 1 Energy from the outside air is transferred to the liquid refrigerant and circulated through the evaporator.
- 2 The heated refrigerant gas is then compressed to reduce its volume but increases its temperature.
- 3 The compressed gas enters the condenser surrounded by water from the heating system, where it gives up its heat.
- 4 The cooler liquid refrigerant then passes through the expansion valve which reduces the pressure.

## LG Therma V Heat Pumps

### LG Therma V range

With a wide range of power ratings available and in mono, split and high temperature versions, the LG Therma V range is a fully flexible system that will meet most application needs.

All are fully MCS approved and the range is compliant with domestic RHI requirements, subject to MCS installation.

### Therma V Mono

Suited to properties with older radiators. Maximum water temperature of 57°C.

## Panasonic Aquarea Heat Pumps

### Innovative solution from a brand leader

The ideal heating solution for new and existing buildings. Panasonic's Aquarea range is supplied in 3 ranges according to needs and environment.

**High Performance, T-Cap** and **HT** are all available in monobloc (requiring no refrigerated connection), or split/bi-bloc (with separate indoor and outdoor unit).

Single phase versions are shown below.

Three phase models are available on request

### Aquarea High Performance Range

Ideal for low consumption houses and available from 3 to 16kW.

## Dimplex Heat Pumps

### A class of its own

The A-Class range of inverter driven Air Source Heat Pumps gives excellent levels of heating and hot water performance at temperature as low as -20°C.

### Air-Eau designed for speedy installation

The Air-Eau range is designed as a plumb and go solution, since it combines all main system and hydraulic components in a single outdoor unit.

Easier installation results as the monobloc units only require cylinder and control valve connection. No refrigerant expertise is needed.

A-Class

Air-Eau

### A-Class Range

Buy one of our A-Class packs available online or choose a heat pump alone.

Type	Description	Product code	Part number	Weight (kg)	Width x Height x Depth (mm)	Heating capacity (+7°C)	Heating capacity (-7°C)	CoP (-7°C)	CoP (-7°C)
	<b>12kW 1PH Heating Only</b>	2500610961	A12M (49056)	130	932 x 1571 x 401	12	12	3	3
	<b>16kW 1PH Heating Only</b>	2500610962	A16M (46499)	130	932 x 1571 x 401	12	14.3	3	3

### Air-Eau Range

One of the most advanced, efficient and high performance air source heat pump ranges available.

Type	Description	Product code	Part number	Weight (kg)	Width x Height x Depth (mm)	Heating capacity (+7°C)	Heating capacity (-7°C)	CoP (-7°C)	CoP (-7°C)
	<b>6kW 1PH Heating Only</b>	2500490979	42835	122	865 x 1,283 x 320	6	5.9	2.8	2.8
	<b>9kW 1PH Heating Only</b>	2500490980	42842	122	865 x 1,283 x 320	9	8.9	11.4	11.4

## Air Radiators

Air radiators are the ideal heat emitter for air and ground source heating. They deliver high efficiency heating and cooling by incorporating a fan.

Our range complements any heat pump system and we can supply radiators from leading brands such as Panasonic, Dimplex and Jaga.

### How they work

**Water temperature needed to produce 2.0kW of energy**

Traditional Cast Iron Radiator

Panasonic Aquarea Radiator

Air radiators deliver high efficiency heating and cooling by incorporating a fan.

Operating on heating mode with radiator using only radiant effect

Operating on heating mode with radiant effect and fan mode

Operating on cooling mode with fan

### Aquarea Radiators

**Panasonic**

#### Attractive in the home

These high efficiency Aquarea Air terminals are extremely slim, with a depth of just under 13cm. Blending easily into the home, the elegant design is easy to see.

Product code	Description	Part number
2500602748	Aquarea 200 Ltr w/ Radiant Panel	PAW-AAIR-200
2500602749	Aquarea 700 Ltr w/ Radiant Panel	PAW-AAIR-700
2500602750	Aquarea 900 Ltr w/ Radiant Panel	PAW-AAIR-900
2500668277	Aquarea 200 Ltr High Efficiency	PAW-AAIR-200L
2500668266	Aquarea 700 Ltr High Efficiency	PAW-AAIR-700L
2500668267	Aquarea 900 Ltr High Efficiency	PAW-AAIR-900L

### Smartrad Radiators

**Dimplex**

#### Stylish design

Ideal for use with heat pumps or condensing boilers, stylishly designed thermal emitters with black or white glass front or metal front.

Product code	Description	Part number
2500489811	Smartrad 800W White Glass	SRX080WG
2500489812	Smartrad 1200W White Glass	SRX120WG
2500489813	Smartrad 1400W White Glass	SRX140WG
2500489814	Smartrad 1800W White Glass	SRX180WG
2500355538	Smartrad 800W Metal	SRX080M

# Biomass Boilers

Using wood pellets as fuel is an effective, dependable heating solution and a more environmentally friendly alternative to a fossil fuel boiler.

Our biomass boiler Partner, GreenFlame, is part of the Trianco brand. We supply internal and external models in a range of outputs, as well as many accessories.

## Greenflame Biomass Boilers

### Environmentally friendly heating in a range of capacities

Manufactured to the highest of standards, Greenflame biomass wood pellet boilers are superbly produced using precision engineering.

Internal models range from 15kW to 28kW for domestic use and 50kW to 199kW for commercial applications.

The external models are firm favourites with local authorities, housing associations and homeowners, and come complete with twin walled stainless steel flue system and a textured weatherproof casing. The same technical features as internal models apply, but with added frost stat protection.

Greenflame PLUS models include;

**GSM Modem** – Using a normal phone SIM card with data package, the user can turn the boiler on or off by text to the modem. Low pellet alerts also notify the users phone.

**Heat Meter** – An approved industry standard and RHI compliant heat meter is fitted to measure heat generated by the boiler.

## Greenflame Biomass Boilers

## Greenflame Accessories

### Pellet feed and heat measurement

The vacuum feeder removes dust from pellet fuel before delivering them to the burner.

Alternatively the auger feed rotates pellets through the system via an internal helical screw blade.

The heat meter is an RHI compliant unit fitted to measure heat generated.

Product code	Description	Part number
2500566712	Short Auger C/W Motor	FG3722

## Smart Heating

Making energy saving easier, homes are becoming smarter as intelligent sensors let us control heating from a range of internet connected devices.

Our Nest learning thermostat has a range of clever features that help your customers to save energy. They are designed to be easy to fit to new or existing homes.

## Control from anywhere

Connect Nest to Wi-Fi and you can control it from your mobile, tablet or laptop.

Just download the free Nest app.

### Nest Learning Thermostat

#### Programmer and thermostat in one

The Nest Learning Thermostat is an ideal heating management tool for your customers. Nest learns the heating schedule to programme itself, notices when the occupier is out and automatically turns down the heat. It can be controlled from a mobile or tablet.

- Learns and manages your energy use
- Controlled from your phone
- Gives a monthly energy report
- Knows when you're away

#### New Generation 3

Here we have the latest model of Nest boasting a thinner, sleeker design with a bigger, sharper display.

Hot water control is also now included among its features.

- Hot water schedule which users can adjust from the App
- Thermostat turns off water when user is away from home
- Boost feature controlled from the App

**NEW**

Product code	Description	Part number	From
2500835024	Generation 3 Learning Thermostat	T3010GB	£165.84
2500835025	Generation 3 Learning Thermostat Stand	AT2100ED	£24.17
2500681236	Learning Thermostat	T200377	£149.17

### Nest Accessories

#### Nest Cam - indoor web camera

- Streams video in super-clear HD
- 130° wide-angle camera
- Includes advanced night vision and zoom

#### Nest Protect - Smoke and CO2 detector

- Detects all types of fire
- Heads-up early warning function

Product code	Description	Part number	From
2500798878	NEST Indoor Camera	NC1102GB	£132.50
2500798877	2nd Gen Smoke/Carbon Monoxide Alarm (Wired)	S3003LWGB	£74.17
2500798876	2nd Gen Smoke/Carbon Monoxide Alarm (Battery)	S3000BWGB	£74.17

# Energy Monitoring

Measuring and monitoring energy is fast becoming an obligatory process for many households as conventional energy costs rise.

We stock a small range of energy monitors that can be used to track where your customers' energy is being used and which appliances use the most.

## Smappee Home Energy Monitor

### Real time monitoring and control made easy

Smappee gives you:

- Clear insights into your energy consumption
- No subscription fee, this is a one-time purchase
- Free Smappee app from the App Store and Google Play and automatic free updates
- From 10 to 30% savings on your electricity cost, without losing comfort
- You contribute to a better environment
- One free Comfort Plug included

**If your customer has Solar Panels, you need to select the proper Smappee version in order to guarantee correct measurements.**

Product code	Description	Part number	From
2500818767	Smappee T Energy Monitor 1Ph Solar Pack	T-1PH	£128.17
2500818768	Smappee T Energy Monitor 3Ph Solar Pack	T-3PH	£128.17
2500818769	Smappee S Energy Monitor 3Ph Solar Pack	S-3PH	£196.46

## Smappee Pro Commercial Energy Monitor

### Smart energy control for SMEs

Turn your business sites into a smart energy network. Smappee Pro is an energy management solution that combines industrial-grade features with the ease of use and cost-efficiency of the Smappee award-winning home energy solution.

Features include:

- Real time visibility across multiple sites
- Web portal for 24/7 monitoring
- Monitor down to individual appliances
- Easy to install current clamps – no need to power down
- Add Comfort Plugs for the ability to control appliances from a mobile

Product code	Description	Part number	From
2500850559	Smappee Pro Energy Monitor Starter Kit (Includes 3 200a clamps)	SMAP PRO STARTER KIT	£578.00
2500850558	Smappee Pro Energy Monitor (Excluding current clamps)	SMAP PRO EXCL CT	£506.00
2500850560	Smappee Pro current clamp - 50A	SMAP PRO 50A CT	£15.66

2500850562	Smappee Pro current clamp - 200A	SMAP PRO 200A CT	£23.15
2500850563	Smappee Pro current clamp - 400A	SMAP PRO 400A CT	£48.84
2500850564	Smappee Pro current clamp - 800A	SMAP PRO 800A CT	£73.24
2500850565	Smappee Pro Annual Licence	SMAP PRO ANNUAL LICENSE	£253.00

## Smappee Accessories

### Smappee Gas & Water Monitor

Gives you clear and simple insights into your gas and water consumption.

### Smappee Comfort Plug

Turns appliances on or off remotely with this wireless adapter which fits between the device and the power point. Please note that one is already included in the Smappee Home Energy Monitor.

Product code	Description	Part number	From
2500892468	Smappee Gas & Water Monitor	GW1	£96.26
2500818770	Smappee Energy Monitor Comfort Plug (3 Pack) + Remote	COMFORT PLUG 3PK	£26.55
2500818771	Smappee Energy Monitor Comfort Plug (6 Pack) + Remote x2	COMFORT PLUG 6PK	£45.50

# Voltage Optimisation

Optimising the voltage used in a commercial or residential building means lamps need to be changed less often and energy savings made overall.

Our commercial and domestic voltage optimisation units from GWE reduce mains voltage down to 220V, while being simple to install and maintenance free.

## How they work

### High energy saving Typically 20-50%

- Switch start fluorescent lighting, (with magnetic ballast)
- Discharge lighting, with SON metal halide or mercury lamps and magnetic ballast
- Lighting with compact fluorescent lamps and magnetic ballast
- Tungsten halogen lighting
- Fixed speed motors that are not fully loaded (i.e. air conditioning, refrigeration, pumps and fans)

### Modest energy saving Typically 10-15%

- Fixed speed heavily loaded motors
- Some older types of IT equipment, VDUs and TVs
- Non-thermostatically controlled heating (e.g. towel rails, hand dryers, hair dryers and certain types of electric heating)

### Little or no energy saving Typically 0-5%

- High frequency (HF) lighting
- Some IT equipment
- Motors with VSDs
- Thermostatically controlled heating (e.g. kettles & ovens)

## GWE Eco-Max Domestic & Commercial

### Reduce electricity the smart way

Eco-Max uses voltage optimisation to reduce voltage to its most efficient level of around 220V. This minimises the energy wasted in heat and vibration, significantly reducing your carbon footprint and energy consumption.

### Simple installation

Installation is quick as the unit fits easily between electricity meter and consumer unit or distribution board.

The unit is available as a single phase home unit (Eco-Max Home) and the three phase commercial unit (Eco-Max Commercial).

### Eco-Max Commercial Advanced

Eco-Max Commercial Advanced gives you added features including 3 savings settings.

- Reduces your electricity consumption by up to 19%
- Three adjustable savings settings for optimum voltage control
- Saves you money 24hrs a day, 7days a week
- Reduces your carbon footprint
- Your electrical appliances last longer
- Works with solar PV, wind power and heat pumps etc
- Easily installed by qualified electrician
- Made in the UK

Ideal voltage range for maximum efficiency
